

International Students in our High Schools:

Journeys that Change Your Life

“Diversity is a fact, but inclusion is a choice we make every day. As leaders, we have to put out the message that we embrace and not just tolerate diversity.”

-Nellie Borrero

Future Plans for Our International Students

How Do Our Teachers Benefit From Teaching International Students?

“In many ways the international students teach me more than I can teach them. In science, hydrogen will always be hydrogen, but the world is constantly changing, and our perspective must adapt given our own personal experiences. I, and my students, learn cultural differences and values which I feel is very important in a rural community. Academically, I see firsthand the aptitude these students have and how much more I must challenge our own students to stay relevant and able to compete on the world stage. International student programming is a bonus for teachers as real in-class professional development.”

Glen Mori
- MTHS Science Teacher
